

Adding Decimals: What's For Lunch?

Topic: CCSS 5.NBTA.3 – Read, write, and compare decimals to thousandths.

A food truck parks outside of an office building. Here is the menu:

| | | | |
|--------------------------|---------|----------------------|--------|
| Taco | \$1.95 | Burrito | \$8.99 |
| Combination Plate | \$12.48 | Drink | \$0.97 |
| Side of Rice | \$1.19 | Side of Beans | \$1.31 |
| Chips and Salsa | \$3.06 | Add Guacamole | \$0.88 |

Instructions: Some of the office workers place an order at the truck. Calculate the total cost of each order.

Samir – 1 taco and 1 drink

Total: _____

Ava – 1 combination plate and 1 order of chips and salsa

Total: _____

William – 1 burrito with guacamole and 1 drink

Total: _____

Damian – 2 tacos and 1 order of chips and salsa

Total: _____

Reyna – 1 taco, 1 side of rice, 1 side of beans

Total: _____

Shanice – 2 tacos, 1 drink, and 1 side of rice

Total: _____

The office manager will pay for all of the orders and then ask the employees to pay back what they each owe. How much will the office manager pay the food truck for the entire order? (Use the back of the paper to do your work.)

Total: _____
